

## SCRC President's Report – 2022

Rick Crooker

With a new set of By-Laws, we now have Directors responsible for all key functions of the Club. Each of them will be submitting a report recapping their area for 2022.

With 2022 being my final year as president and a director of the club I would like to thank all the directors I had the opportunity to work with since joining the board in 2016. High quality volunteers like all of them have been the reason SCRC is one of the leading clubs in Canada.

Like thousands of organizations, we had a tough 2 years of COVID shutdown but 2022 showed we can and will recover to our former level of competition and I am confident the club will push to new heights.

Henley Island is a remarkable amalgam of organizations that work together to make it a truly unique success. CHRC, SCRAA, HIH, Ridley, and Brock all work together with our programs from Recreational, Masters, Seniors, and Juniors to ensure rowers of every age and ability have the best opportunity for success.

With the new Neil Campbell Training Centre now in place there is additional training and entertainment space to attract more people to the Island.

I look forward to reading about the continued success of SCRC for many years to come.
